

On the same page, same table, same column, for Satt 324R, delete its existing primer sequence and insert therefor GCGTTCTTTATACCTTCAAG.

No new matter is presented by this amendment in that Sequences For the PCR Primers Used to Amplify SSR Loci in Soybean are publicly available at <http://129.186.2.6.94/ssr.html> (copy attached). Primer Sequences are attached for Satt 306R, Satt 308F, Satt 369R and Satt 324R.

Respectfully Submitted,

Gordon F. Sieckmann, Reg. No. 28,667
